

9.1P: In Person Check-in 3 – Answer Sheet

1. What was the most challenging aspect of the case study tasks? Why?

The different version and the lack of explanation in the lack of instructions in each part

2. What is the most valuable thing you have learned in this unit so far?

How to code in C#

3. What are some strategies for success you can start or continue using for the remainder of the semester and in future units?

Reading the whole thing before starting on the project

4. Have you heard of design patterns? Did you use any design patterns in the Swin Adventure case study? If yes, please explain where they were used.

Kinda and not really, I mainly went at each problem independently as it stopped me from relying on patterns and was more flexible
